NAME OF OFFEROR OR CONTRACTOR		

SECTION SF 30 BLOCK 14 CONTINUATION PAGE

QUESTION:

Paragraph 6.1 of the Procurement Specification states “The Contractor shall assume single source responsibility for system assembly. An assembled system may include enclosures, mounting and wiring of relays, motor starters, transformers, and disconnecting means, interface cables and connectors or other control devices as specified by customer-supplied documentation.” Is the Government merely indicating the successful offeror must include these devices solely for the support of the PLCs themselves and not to support any other present equipment on-board the ship or other planned equipment on-board the ship?

ANSWER:

Paragraph 6.1 indicates the contractor is responsible for furnishing an assembled Integrated Machinery Control System. The Integrated Machinery Control System will consist of 11 PLC Enclosures (See Paragraph 1.5, which includes eight dual Enclosures and three single Enclosures), 2 Relay Boxes (See Paragraph 1.10) and 2 Control System Displays/Operator Terminals (See Paragraphs 1.7 and Section 5). All PLC Enclosure, Relay Box and Control System System Display/Operator Terminal Components (i.e. enclosures, motor starters, transformers, etc.) shall be delivered fully mounted, wired and/or assembled. These components are “solely for the support” of the PLC Enclosures, Relay Boxes and Control System Displays/Operator Terminals and are not for the support of any other existing or planned shipboard equipment.

The closing date for the receipt of offer is **NOT** extended.
